

Monthly Reporting obligations under the Waste Management (Tyres and Waste Tyres) Regulations 2017.

The reporting requirements under the Waste Management (Tyres and Waste Tyres) Regulations 2017 depend on the role and activity of the operator. In general:

- a Producer is any operator who places tyres on the Irish market and charges the vEMC for the first time.
- a Retailer sells tyres (for which a vEMC has already been charged) to a consumer or other operators.

Producers are obliged to report to the PRL and Retailers are obliged to report to Repak ELT.

NB: If you are operating in a dual capacity (Producer & Retailer) you will be required to report separately to the PRL (for producer activity) and Repak ELT (for retail activity). Producers may choose to 'Opt-In'¹ with the PRL, thereby removing the need to replicate this element of reporting with Repak ELT.

See the following examples:

Your obligation:	Supply Chain	Report to	Report to PRL	Report to Repak ELT
Producer	Buy from supplier, (apply the vEMC for the first time) and sell to retailer (B2B).	PRL only	Tyres placed on the market with the vEMC applied for the first time.	N/A.
	Producer (applying vEMC for the first time) sells tyres to the trade only (B2B) - all tyres are reported to PRL and nothing to Repak ELT.			

Your obligation:	Supply Chain	Report to	Report to PRL	Report to Repak ELT
Producer / Retailer	Buy from supplier, (apply the vEMC for the first time) and sell to the public (B2C).	Both PRL and Repak ELT	Tyres placed on the market with the vEMC applied for the first time.	Tyres purchased, sold and waste tyres collected.
	Tyre Operator has dual obligations as they buy tyres from abroad (i.e. Producer obligations as they are applying vEMC for the first time) and sell to the public (i.e. Retailer obligations). In this instance, you report as a Producer to the PRL (tyres sold with vEMC applied for the first time), and report as a Retailer to Repak ELT (your tyres sold to the public (B2C) and waste tyres collected).			

Your obligation:	Supply Chain	Report to	Report to PRL	Report to Repak ELT
Retailer	Buy from supplier, (from which a vEMC has already been charged) and sell to retailer (B2B) or the public (B2C).	Repak ELT only.	N/A.	All tyres purchased, sold and waste tyres collected.
	Tyre operator buys tyres from a registered Producer and sells these tyres to the trade (B2B) - They report all tyres purchased, sold & waste collected to Repak ELT and nothing to PRL.			

¹ By deciding to 'Opt-In' the Producer authorises the PRL to share their monthly reporting data with Repak ELT. This data remains secure & confidential and will never be passed on to any 3rd party.
